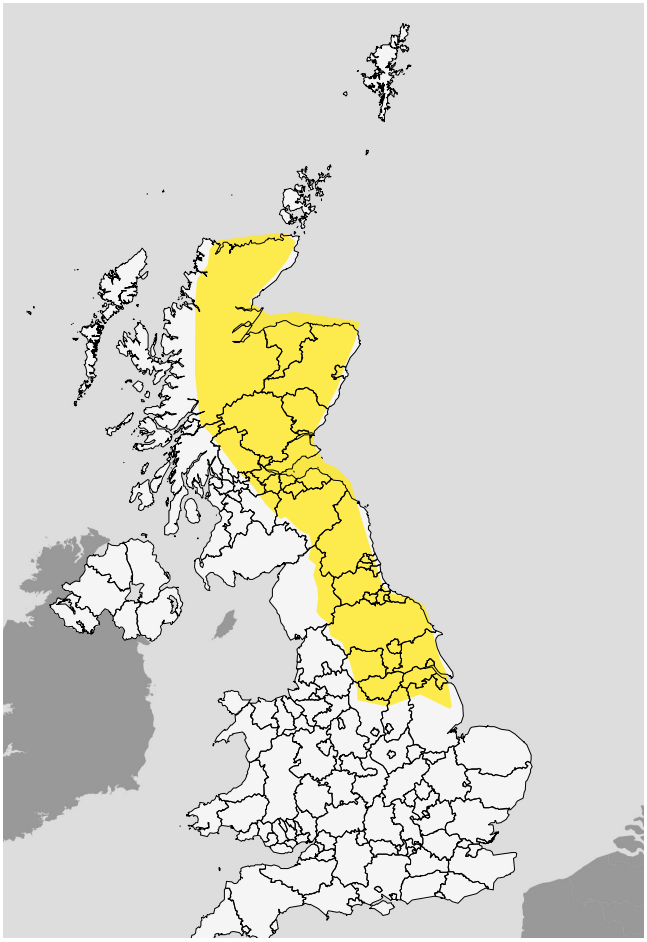
Yellow warning
Ice

Between
21:00 Sat 13 Feb 2021 and
15:00 Sun 14 Feb 2021



Treacherous ice may develop, at least in a few places, following freezing rain. Where it occurs, significant disruption is possible.

What to expect

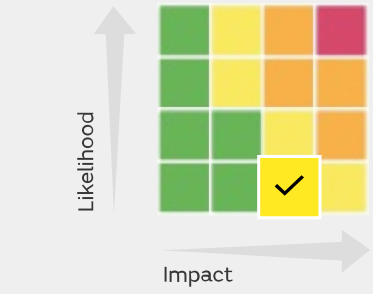
- There is a chance that dangerous driving conditions may occur in at least a few places, leading to road traffic collisions, road closures and longer journey times by public and private transport.
- A small chance of injuries from slips and falls on icy surfaces.
- A small chance that untreated pavements and cycle paths may quickly become treacherous and possibly impassable.

Further details

Further freezing rain is possible this morning and early afternoon over Scotland and also over high ground in northern England. This freezing rain is likely to be quite localised, but where it does occur will rapidly cause icy and and somewhat treacherous stretches on roads and pavements.

Reason for update

Western parts of the warning area removed and end time brought forward.



Very low likelihood of medium impacts
